BY 3 February 2012

We are thrilled that **Julie Stacey** has agreed to facilitate this Seminar in her capacity as an Associate of the Jesuit Institute. After graduating with a postgraduate degree in earth- and life-sciences, Julie went on to a highly successful corporate career in areas related to environmental sustainability. Her positions and roles **included** being global Safety, Health and Environment (SHE) Policy Manager and Sustainable Development (SD) Operations Manager for Anglo American plc. She has also been the General Manager and Project Director of the South African branch of an Australian consulting firm and Chairman of the Sustainable Development Forum of the Institute of Directors in Southern Africa for two years, with whom she was also a Council member, as well as serving on two task teams of the King III Code for Corporate Governance revision process. Her diverse and extensive experience means that she is exceptionally well qualified to integrate the scientific grounds of our global environmental crisis, with the spiritual commitment necessary to make an authentic difference to our world.
